To: Statutory Consultation

Subject: Consultation - FAO Amanda Newton

Dear M/s Newton,

We have received a letter from Peter Marsh reminding us of the need to respond to the three documents involved in the national consultation. Please forgive our delay but we had assumed that our reply concerning the national conversation was the same thing. We have perused the documents and see little to criticise but are aware that as extremely small providers our views may be coloured by a certain lack of impact. We can only comment that none of the proposals seem other than logical. We accept that NROSH plays no more than a subsidiary role in this but do plead that the system be simplified - it has proved most difficult to operate and very time consuming for small providers.

Yours truly

Peter H R Crook
